

Connect iSolved to Benefit Carriers, and Simplify Your Benefit Process

Health care and benefits are becoming more and more complex every day. Staying on top of benefits offerings and transmitting data to insurance carriers is time consuming. Incorrect data leads to problems with insurance coverage, and that means costly errors.

With an automated connection, the process is dramatically simplified. Employers can easily manage benefits through iSolved, and all updates are automatically transmitted to the benefit carrier(s) as often as needed, based on the carriers.

No matter how many employees your organization has, or even if you work with multiple insurance carriers, an automated connection simplifies the process. It works by offering both EDI file integration and Digitized Forms that transmit data from iSolved to the carriers within 1-2 weeks of starting service. Files and forms are created and managed in the background of iSolved.

**EverythingBenefits is the iSolved Marketplace Preferred Vendor.
It works with a variety of benefit types, including:**

- Medical
- Dental
- Vision
- Short/Long Term Disability
- Life Insurance
- HSA/FSA Enrollments/Changes/Terminations
- 401(k)
